

# Background, purpose & context

- This is a data profile of the health and wellbeing of the population of West Sussex.
- It forms part of the West Sussex Joint Strategic Needs Assessment
- It also details the causes of premature mortality and ill health using information from the Global Burden of Disease study and sets out some of the key challenges and priorities arising from the information available.
- This is a summary profile. It includes information from a range of sources, but as a summary it does not include all issues, or health conditions. It brings together data in the public domain, we have focused on quantitative data that can be benchmarked).
- Profiles have been drafted for West Sussex overall and for the District and Borough areas, not all data are available at all levels
- Given the frequency of data released and refreshed, it is a live document, meaning the information will be updated and reviewed. This version was produced in September 2024 by the West Sussex Public Health and Social Research Unit

# What causes ill health and premature mortality in West Sussex?

## Using the **Global Burden of Disease Study**

The Global Burden of Disease (GBD) study aims to explore both the burden of mortality and morbidity on the population. While mortality statistics are regularly published by national and local bodies (e.g. the Office for National Statistics) the scale of morbidity often goes unreported. The project brings together data on premature death and disability for many diseases and injuries worldwide. This allows for meaningful comparisons to be made between countries and can be explored from 1990 to the present. Within the UK, county level analyses were made available for the first time in 2016. Information in this profile relates to the 2021 study.

## Four measures are used to describe the burden of disease.

### Deaths

#### Years of Life Lost (YLL)

YLL is a measure of premature mortality within a group of people. YLLs are calculated by starting with the life expectancy of a given age group in a given year, then subtracting the age at which a person in that age group dies. Greater emphasis is placed on deaths of younger people.

#### Years Lived With Disability (YLD)

YLD is a measure of the amount of time lived with a disability. This is calculated by multiplying the severity of a disability by its duration. Severe, short-term illness can therefore have the same number of YLDs as a chronic but mild health condition.

#### Disability-adjusted life years (DALY)

DALY is a measure of overall disease burden. This aims to quantify premature mortality (YLL) and years lived in less than full health (YLD) to produce a metric of years lost due to ill-health, disability or premature death. Ranking the causes of DALYs in a population helps to identify health problems that have the biggest negative impact on society.

# The Top Tens - West Sussex

Rank	Deaths	Years of Life Lost (YLLs)	Years Lived with a Disability (YLDs)	Disability-adjusted life years lost (DALYs)
1	Neoplasms (2,892)	Neoplasms (50,765)	Musculoskeletal disorders (27,454)	Neoplasms (53,800)
2	Cardiovascular diseases (2,427)	Cardiovascular diseases (33,791)	Mental disorders (21,766)	Cardiovascular diseases (38,756)
3	Respiratory infections and tuberculosis (1,866)	Respiratory infections and tuberculosis (24,871)	Neurological disorders (11,032)	Musculoskeletal disorders (28,297)
4	Neurological disorders (909)	Neurological disorders (11,846)	Other non-communicable diseases (9,819)	Respiratory infections and tuberculosis (26,648)
5	Chronic respiratory diseases (670)	Chronic respiratory diseases (9,660)	Sense organ diseases (9,145)	Neurological disorders (22,878)
6	Digestive diseases (451)	Digestive diseases (7,855)	Diabetes and kidney diseases (8,398)	Mental disorders (21,772)
7	Diabetes and kidney diseases (216)	Other non-communicable diseases (3,226)	Unintentional injuries (7,954)	Chronic respiratory diseases (15,602)
8	Unintentional injuries (186)	Self-harm and interpersonal violence (3,172)	Chronic respiratory diseases (5,942)	Other non-communicable diseases (13,045)
9	Other non-communicable diseases (165)	Diabetes and kidney diseases (2,905)	Cardiovascular diseases (4,964)	Diabetes and kidney diseases (11,303)
10	Self-harm and interpersonal violence (79)	Unintentional injuries (2,874)	Skin and subcutaneous diseases (4,789)	Unintentional injuries (10,828)

# Risk Factors...What Drives Ill Health & Mortality?

A risk factor is defined as an attribute, behaviour, or exposure, causally associated with an increased (or decreased) probability of a disease or injury. Risk factors can overlap. Some risk factors are modifiable at the level of the individual (e.g. smoking, dietary intake). Others are modifiable at wider environmental levels (e.g. air pollution). We don't know all risk factors, but we need to use the best available evidence to inform actions.

**If we want to improve population health we need to understand what the risk factors are for the West Sussex population and whether, and how, we can modify them.**

Rank	WEST SUSSEX	SOUTHEAST
1	Tobacco	Tobacco
2	High body-mass index	High body-mass index
3	Dietary risks	Dietary risks
4	High fasting plasma glucose	High fasting plasma glucose
5	High systolic blood pressure	High systolic blood pressure
6	Alcohol use	Alcohol use
7	Occupational risks	Occupational risks
8	High LDL cholesterol	High LDL cholesterol
9	Kidney dysfunction	Kidney dysfunction
10	Air pollution	Drug use

# Summary

To improve life expectancy and extend healthy life expectancy, to reduce health inequalities, reduce health care demand and sustain economic activity rates in the future....

For Life Expectancy, Health Life Expectancy, Inequalities in LE and HLE

- Tackle major behavioural risks – tobacco, diet, exercise, alcohol
- Diabetes is a rising concern
- CVD Reduction – including controlling blood pressure key and has considerable population impact
- Cancer major cause ill health, importance of behaviours and screening,

For Healthy Life Expectancy, Inequalities in HLE tackle

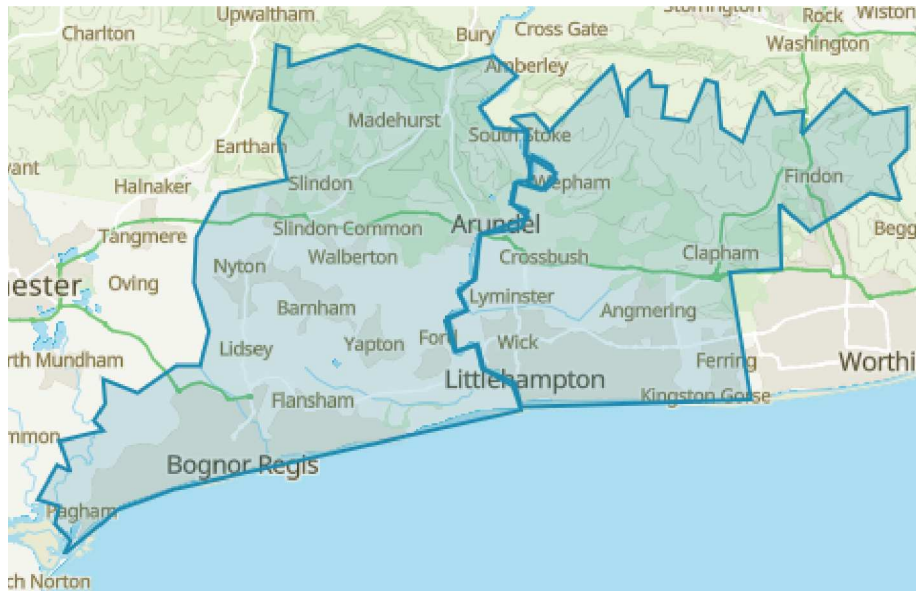

- MSK – (and pain management)
- Mental Health
- Sensory impairment

Research also identifies specific groups who have far lower life and healthy life expectancies (such as people with learning disability, people with mental health problems, people who are homeless or have insecure housing).

This does not include the causes of the causes – wider determinants of health (education, employment, housing, social capital etc).

# Arun - Population

Population (2023)

**168,000**

Change from 2013

↑ **9.1% overall**

↑ **5.8% under 15 years**

↑ **7.4% 16-64 years**

↑ **14.7% 65 years or over**

Births (2023)

**1,230**

Fertility rate of 1.39

Deaths (2023)

**2,318**

of which 578 deaths of people aged under 75

## Population Age Structure (2023)

% of Population in Different Age Groups

● Arun ● England

Median Age

(England 40.4)

## Households (Census 2021)

**72,650**

households with at least one resident in West Sussex

- **22,750** people live alone including including 13,330 people aged 66 years or over
- **3,880** lone parent households (with dependent children)

**3,460**

people live in communal establishments

## Age

Arun has a far older age profile compared with England. In Arun there are over 48,400 people aged 65 years or over (over 7,400 people aged 85+) 25,600 aged under 16 years.

## Disability

Arun (England)

- **Disabled** under the Equality Act **19.7%** (17.3%)
- **Not disabled** under the Equality Act **80.3%** (82.7%)

## Ethnicity

Arun (England)

- **Asian, Asian British or Asian Welsh** **1.6%** (9.6%)
- **Black, Black British, Black Welsh, Caribbean or African** **0.5%** (4.2%)
- **Mixed or Multiple ethnic groups** **1.5%** (3.0%)
- **White** **95.8%** (81.0%)
- **Other ethnic group** **0.6%** (2.2%)

## Other Groups

### Carers

**14,560 people** provide unpaid care, 4,540 for 50+ hours a week, and 335 aged under 18 years

### English - 2nd Language

Of the **9,470** who have English as a second language, 3,540 do not speak it well, and 3,685 do not speak it at all

### Children Looked After

As at March 31 2023 there were **887 children** looked after in West Sussex, of these **88** were **unaccompanied asylum-seeking children** (Data for West Sussex overall)

Source: DfE

### Veterans

**5,930 people** stated on the 2021 Census that they had previously serviced in the armed forces.

## Gender Reassignment

Arun

- **Same as sex registered at birth** - 131,448
- **Different from sex registered - no specific identity given** - 250
- **Trans woman** - 87
- **Trans man** - 92
- **Non-binary** - 54
- **All other gender identities** - 32
- **Not answered** - 7,594

## Marriage/Civil Partnership

Arun (England)

- **Never married / civil partnership** **30.6%** (37.9%)
- **Married / civil partnership** **47.5%** (44.7%)
- **Separated** **2.2%** (2.2%)
- **Divorced / civil partnership dissolved** **11.3%** (9.1%)
- **Widowed / surviving civil partnership partner** **8.4%** (6.1%)

## Pregnancy and maternity

Arun (2021)

- **Births** - 1,375
- **U18 Conceptions** - 24

## Religion

Arun(England)

- **No religion** **39.9%** (36.7%)
- **Christian** **52.1%** (46.3%)
- **Buddhist** **0.3%** (0.5%)
- **Hindu** **0.2%** (1.8%)
- **Jewish** **0.2%** (0.5%)
- **Muslim** **0.7%** (6.7%)
- **Sikh** **0.0%** (0.9%)
- **Other religion** **0.5%** (0.6%)
- **Not answered** **6.0%** (6.0%)

## Sex

Arun (England)

- **Female** **51.8%** (51.0%)
- **Male** **48.2%** (49.0%)

Arun has an older age structure. As women, on average, live longer a greater proportion of the population is female, and this increases in older age groups.

## Sexual Orientation

Arun (England) - % of 16+

- **Straight/Heterosexual** **90.3%** (89.4%)
- **Gay or Lesbian** **1.4%** (1.5%)
- **Bisexual** **1.0%** (1.3%)
- **All other sexual orientations** **0.2%** (0.3%)
- **Not answered** **7.1%** (7.5%)

\*The Equality Act 2010 consolidated and replaced previous legislation in a Single Act. There are nine protected characteristics; it is against the law to discriminate against someone because of a protected characteristic.

Data source Census 2021 unless stated

## Index of Deprivation 2019

The ID2019 measures relative deprivation, i.e. how deprived one area is compared with another; it doesn't measure absolute deprivation, i.e. how deprived an area is compared with how deprived it was a year ago.

In 2019, West Sussex was ranked as the 129th least deprived upper tier local authority (out of 151) in England, this puts it in the least deprived 20% of the country overall.

Of the West Sussex Districts and Boroughs, Crawley ranks as the most deprived (overall) in West Sussex, followed by Arun, Adur and Worthing. Mid Sussex remains the least deprived area in West Sussex.

## District Deprivation Profiling

The histogram profiles each lower tier local authority. This helps understand the depth and spread of deprivation in each D&B.

Each small area within a local authority is ranked, the lower the rank the more deprived.

In West Sussex, Worthing has fairly even spread. Horsham and Mid Sussex.

In Arun and in Crawley there are some areas within the most 10% deprived neighbourhoods in England (circled red).

**4,085**

children under 16 live in low income households (16.0%, 2022/23)

**3,445**

people of working age on out of work benefits (3.7% of 16-64 year old population) (Sept 2024)

**3,835**

older people in receipt of Pension Credit (Feb 2024)

**1,885**

people are in receipt of Carer's Allowance (Feb 2024)

**Over 6,025**

households on pre-payment electricity meters (in 2017)

**7,400**

households (9.9% of households) in fuel poverty (2022)

**849**

households owed a duty under the Homelessness Reduction Act (2022/23)

**168**

households in temporary accommodation (2022/23)

**1,012**

households have no central heating (Census 2021)

**£350,000**

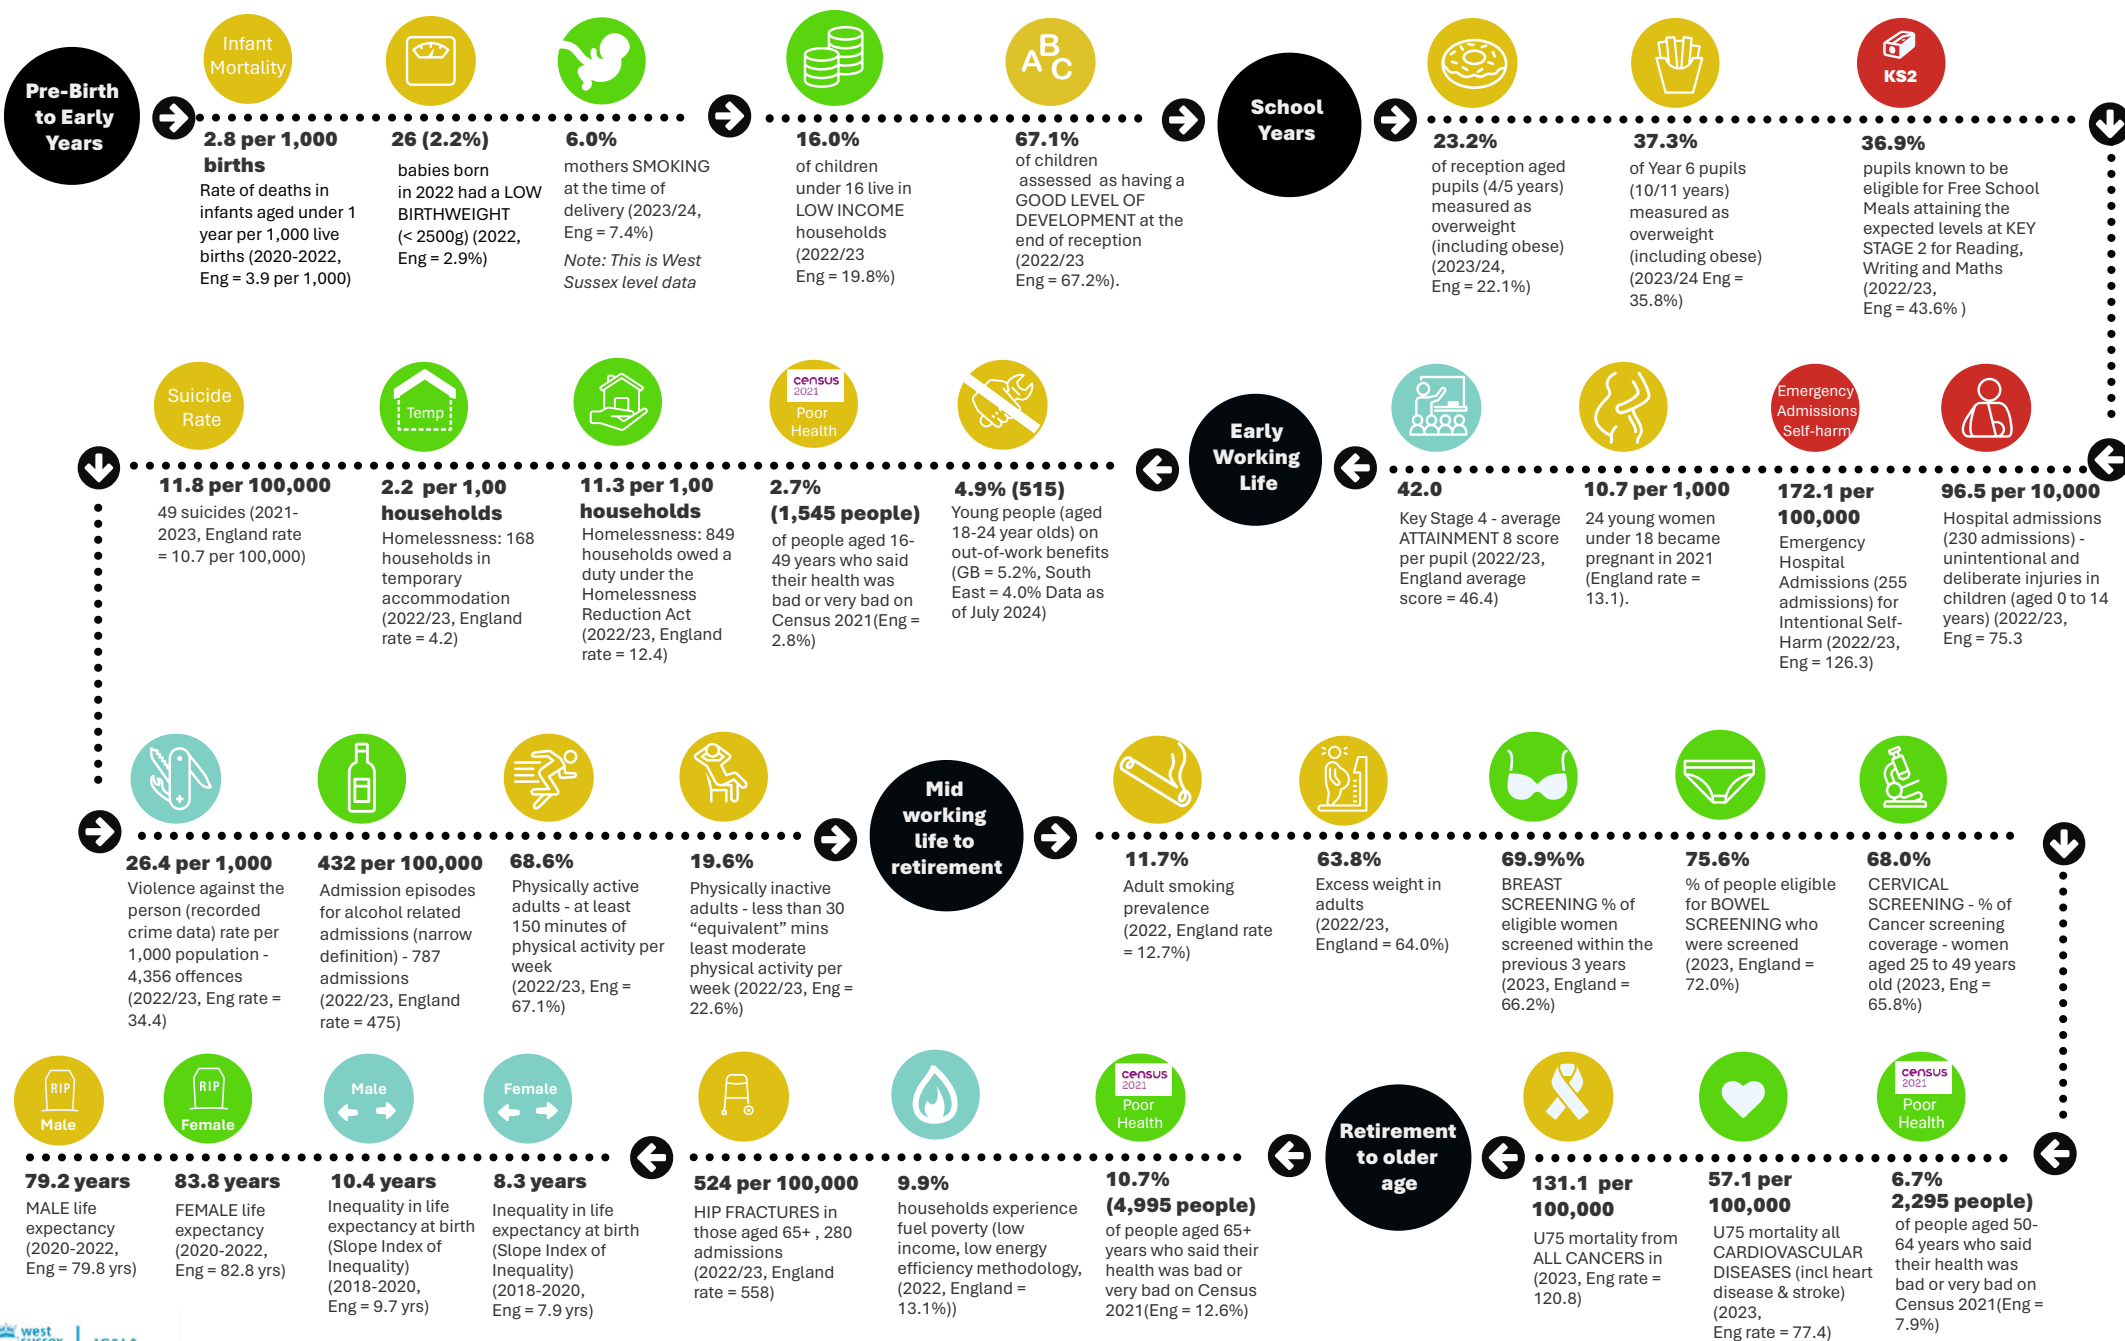

Median house price (year ending Sept 2023)

**£1,053**

Average monthly private sector rent for a 2 bedroom property (2022/23)

## Local Community Networks

Local Community Networks (LCNs) provide a forum to bring Local Government, Health, Voluntary and Community Sector (VCS) and Communities themselves to work together differently to tackle health inequalities, improve impact and outcomes utilising local knowledge, insight, and expertise. In West Sussex LCN area align with local authority boundaries
