Profile background, purpose & context

What causes ill health and premature mortality in West Sussex?

Population Demographics

Life stages Outcomes

Links - Priorities, programmes and contacts

Background, purpose & context

- This is a data profile of the health and wellbeing of the population of West Sussex.
- It forms part of the West Sussex Joint Strategic Needs Assessment
- It also details the causes of premature mortality and ill health using information from the Global Burden of Disease study and sets out some of the key challenges and priorities arising from the information available.
- This is a summary profile. It includes information from a range of sources, but as a summary it does not include all issues, or health conditions. It brings together data in the public domain, we have focused on quantitative data that can be benchmarked).
- Profiles have been drafted for West Sussex overall and for the District and Borough areas, not all data are available at all levels

- Given the frequency of data released and refreshed, it is a live document, meaning the information will be updated and reviewed. This version was produced in September 2024 by the West Sussex Public Health and Social Research Unit

What causes ill health and premature mortality in West Sussex?

Using the **Global Burden of Disease Study**

The Global Burden of Disease (GBD) study aims to explore both the burden of mortality and morbidity on the population. While mortality statistics are regularly published by national and local bodies (e.g. the Office for National Statistics) the scale of morbidity often goes unreported. The project brings together data on premature death and disability for many diseases and injuries worldwide. This allows for meaningful comparisons to be made between countries and can be explored from 1990 to the present. Within the UK, county level analyses were made available for the first time in 2016. Information in this profile relates to the 2021 study.

Four measures are used to describe the burden of disease.

### Deaths

Years of Life Lost (YLL)

YLL is a measure of premature mortality within a group of people. YLLs are calculated by starting with the life expectancy of a given age group in a given year, then subtracting the age at which a person in that age group dies. Greater emphasis is placed on deaths of younger people.

Years Lived With Disability (YLD)

YLD is a measure of the amount of time lived with a disability. This is calculated by multiplying the severity of a disability by its duration. Severe, short-term illness can therefore have the same number of YLDs as a chronic but mild health condition.

Disability-adjusted life years (DALY)

DALY is a measure of overall disease burden. This aims to quantify premature mortality (YLL) and years lived in less than full health (YLD) to produce a metric of years lost due to ill-health, disability or premature death. Ranking the causes of DALYs in a population helps to identify health problems that have the biggest negative impact on society.

The Top Tens - West Sussex

Rank	Deaths	Years of Life Lost (YLLs)	Years Lived with a Disability (YLDs)	Disability-adjusted life years lost (DALYs)
1	Neoplasms (2,892)	Neoplasms (50,765)	Musculoskeletal disorders (27,454)	Neoplasms (53,800)
2	Cardiovascular diseases (2,427)	Cardiovascular diseases (33,791)	Mental disorders (21,766)	Cardiovascular diseases (38,756)
3	Respiratory infections and tuberculosis (1,866)	Respiratory infections and tuberculosis (24,871)	Neurological disorders (11,032)	Musculoskeletal disorders (28,297)
4	Neurological disorders (909)	Neurological disorders (11,846)	Other non-communicable diseases (9,819)	Respiratory infections and tuberculosis (26,648)
5	Chronic respiratory diseases (670)	Chronic respiratory diseases (9,660)	Sense organ diseases (9,145)	Neurological disorders (22,878)
6	Digestive diseases (451)	Digestive diseases (7,855)	Diabetes and kidney diseases (8,398)	Mental disorders (21,772)
7	Diabetes and kidney diseases (216)	Other non-communicable diseases (3,226)	Unintentional injuries (7,954)	Chronic respiratory diseases (15,602)
8	Unintentional injuries (186)	Self-harm and interpersonal violence (3,172)	Chronic respiratory diseases (5,942)	Other non-communicable diseases (13,045)
9	Other non-communicable diseases (165)	Diabetes and kidney diseases (2,905)	Cardiovascular diseases (4,964)	Diabetes and kidney diseases (11,303)
10	Self-harm and interpersonal violence (79)	Unintentional injuries (2,874)	Skin and subcutaneous diseases (4,789)	Unintentional injuries (10,828)

Risk Factors...What Drives Ill Health & Mortality?

A risk factor is defined as an attribute, behaviour, or exposure, causally associated with an increased (or decreased) probability of a disease or injury. Risk factors can overlap. Some risk factors are modifiable at the level of the individual (e.g. smoking, dietary intake). Others are modifiable at wider environmental levels (e.g. air pollution). We don't know all risk factors, but we need to use the best available evidence to inform actions.

If we want to improve population health we need to understand what the risk factors are for the West Sussex population and whether, and how, we can modify them.

Rank	WEST SUSSEX	SOUTH EAST
1	Tobacco	Tobacco
2	High body-mass index	High body-mass index
3	Dietary risks	Dietary risks
4	High fasting plasma glucose	High fasting plasma glucose
5	High systolic blood pressure	High systolic blood pressure
6	Alcohol use	Alcohol use
7	Occupational risks	Occupational risks
8	High LDL cholesterol	High LDL cholesterol
9	Kidney dysfunction	Kidney dysfunction
10	Air pollution	Drug use

Summary

To improve life expectancy and extend healthy life expectancy, to reduce health inequalities, reduce health care demand and sustain economic activity rates in the future....

For Life Expectancy, Health Life Expectancy, Inequalities in LE and HLE
- Tackle major behavioural risks – tobacco, diet, exercise, alcohol
- Diabetes is a rising concern
- CVD Reduction – including controlling blood pressure key and has considerable population impact
- Cancer major cause ill health, importance of behaviours and screening,

For Healthy Life Expectancy, Inequalities in HLE tackle
- MSK – (and pain management)
- Mental Health
- Sensory impairment

Research also identifies specific groups who have far lower life and healthy life expectancies (such as people with learning disability, people with mental health problems, people who are homeless or have insecure housing).

This does not include the causes of the causes – wider determinants of health (education, employment, housing, social capital etc).

Adur - **Protected Characteristics***

Age

Adur has an older age profile compared with England. In Adur there are over 15,500 people aged 65 years or over (2,300 people aged 85+) 11,600 aged under 16 years. (ONS non-census)

Disability

Adur (England)

- **Disabled** under the Equality Act **19.5%** (17.3%)
- **Not disabled** under the Equality Act **80.5%** (82.7%)

Ethnicity

Adur (England)

- **Asian, Asian British or Asian Welsh 2.2%** (9.6%)
- **Black, Black British, Black Welsh, Caribbean or African 0.8%** (4.2%)
- **Mixed or Multiple ethnic groups 2.5%** (3.0%)
- **White 93.4%** (81.0%)
- **Other ethnic group 1.1%** (2.2%)

Gender Reassignment

Adur

- **Same as sex registered at birth** - 5,0,314
- **Different from sex registered** - no specific identity given - 60
- **Trans woman** - 37
- **Trans man** - 26
- **Non-binary** - 27
- **All other gender identities** - 14
- **Not answered** - 2,477

Marriage/Civil Partnership

Adur (England)

- **Never married / civil partnership 33.5%** (37.9%)
- **Married / civil partnership 45.6%** (44.7%)
- **Separated 2.3%** (2.2%)
- **Divorced / civil partnership dissolved 11.0%**(9.1%)
- **Widowed / surviving civil partnership partner 7.6%** (6.1%)

Pregnancy and maternity

Adur (2021, ONS non-census))

- **Births** - 600
- **U18 Conception**s - 11

Religion

Adur (England)

- **No religion 47.9%** (36.7%)
- **Christian 43.1%** (46.3%)
- **Buddhist 0.4%** (0.5%)
- **Hindu 0.3%** (1.8%)
- **Jewish 0.4%** (0.5%)
- **Muslim 1.3%** (6.7%)
- **Sikh 0.1%** (0.9%)
- **Other religion 0.6%** (0.6%)
- **Not answered 5.9%** (6.0%)

Sex

Adur (England)

- **Female 51.6% (51.0%)**
- **Male 48.4% (49.0%)**

Adur has an older age structure. As women, on average, live longer a greater proportion of the population is female, and this increases in older age groups.

Sexual Orientation

Adur (England) - % of 16+

- **Straight/Heterosexual 90.1%** (89.4%)
- **Gay or Lesbian 1.9%** (1.5%)
- **Bisexual 1.2%** (1.3%)
- **All other sexual orientations 0.3%** (0.3%)
- **Not answered 6.5%** (7.5%)

Other Groups

Carers

5,865 people provide unpaid care, 1,745 for 50+ hours a week, and 145 aged under 18 years

English - 2nd Language

Of the **1,970 who have English as a second language,** 1,010 do not speak it well, and 630 do not speak it at all

Children Looked After

As at March 31 2023 there were **887 children looked after** in West Sussex, of these **88 were unaccompanied asylum-seeking children** (Data for West Sussex overall) Data from DfE

Veterans

1,820 people stated on the 2021 Census that they had previously serviced in the armed forces.

*The Equality Act 2010 consolidated and replaced previous legislation in a Single Act. There are nine protected characteristics; it is against the law to discriminate against someone because of a protected characteristic.

Worthing - **Protected Characteristics***

Age

Worthing has an older age profile compared with England. In Worthing there are over 25,600 people aged 65 years or over (over 4,200 people aged 85+) 18,500 aged under 16 years.

Disability

Worthing (England)

- **Disabled** under the Equality Act **19.1%** (17.3%)
- **Not disabled** under the Equality Act **80.9%** (82.7%)

Ethnicity

Worthing (England)

- **Asian, Asian British or Asian Welsh 3.9%** (9.6%)
- **Black, Black British, Black Welsh, Caribbean or African 1.2%** (4.2%)
- **Mixed or Multiple ethnic groups 2.6%** (3.0%)
- **White 91.4%** (81.0%)
- **Other ethnic group 1.0%** (2.2%)

Gender Reassignment

Worthing

- **Same as sex registered at birth -** 86,941
- **Different from sex registered - no specific identity given -** 145
- **Trans woman -** 79
- **Trans man -** 74
- **Non-binary -** 69
- **All other gender identities -** 45
- **Not answered -** 5,000

Marriage/Civil Partnership

Worthing (England)

- **Never married / civil partnership 34.8%** (37.9%)
- **Married / civil partnership 44.0%** (44.7%)
- **Separated 2.4%** (2.2%)
- **Divorced / civil partnership dissolved 11.6%** (9.1%)
- **Widowed / surviving civil partnership partner 7.2%** (6.1%)

Pregnancy and maternity

Worthing (2021)

- **Births -** 982
- **U18 Conceptions -** 10

Religion

Worthing England)

- **No religion 45.7%** (36.7%)
- **Christian 43.9%** (46.3%)
- **Buddhist 0.6%** (0.5%)
- **Hindu 0.7%** (1.8%)
- **Jewish 0.2%** (0.5%)
- **Muslim 1.7%** (6.7%)
- **Sikh 0.1%** (0.9%)
- **Other religion 0.7%** (0.6%)
- **Not answered 6.3%** (6.0%)

Sex

Worthing(England)

- **Female 51.7%** (51.0%)
- **Male 48.3%** (49.0%)

Worthing has an older age structure. As women, on average, live longer a greater proportion of the population is female, and this increases in older age groups.

Sexual Orientation

Worthing (England) - % of 16+

- **Straight/Heterosexual 88.6%** (89.4%)
- **Gay or Lesbian 2.1%** (1.5%)
- **Bisexual 1.5%** (1.3%)
- **All other sexual orientations 0.5%** (0.3%)
- **Not answered 7.3%** (7.5%)

Other Groups

Carers

9,710 people provide unpaid care, 2,830 for 50+ hours a week, and 255aged under 18 years

English - 2nd Language

Of the **5,770 who have English as a second language,** 2,990 do not speak it well, and 1,970 do not speak it at all

Children Looked After

As at March 31 2023 there were **887 children looked after** in West Sussex, of these **88 were unaccompanied asylum-seeking children** (Data for West Sussex overall)
Source: DfE

Veterans

2,940 people stated on the 2021 Census that they had previously serviced in the armed forces.

*The Equality Act 2010 consolidated and replaced previous legislation in a Single Act. There are nine protected characteristics; it is against the law to discriminate against someone because of a protected characteristic.

Data source Census 2021 unless stated

Deprivation

Index of Deprivation 2019

The ID2019 measures relative deprivation, i.e. how deprived one area is compared with another; it doesn't measure absolute deprivation, i.e. how deprived an area is compared with how deprived it was a year ago.

In 2019, West Sussex was ranked as the 129th least deprived upper tier local authority (out of 151) in England, this puts it in the least deprived 20% of the country overall.

Of the West Sussex Districts and Boroughs, Crawley ranks as the most deprived (overall) in West Sussex, followed by Arun, Adur and Worthing. Mid Sussex remains the least deprived area in West Sussex.
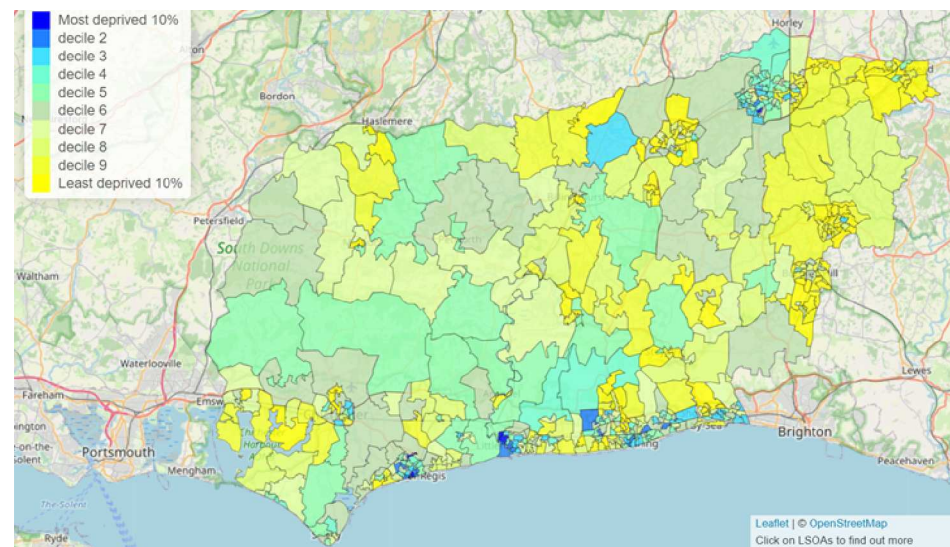

District Deprivation Profiling
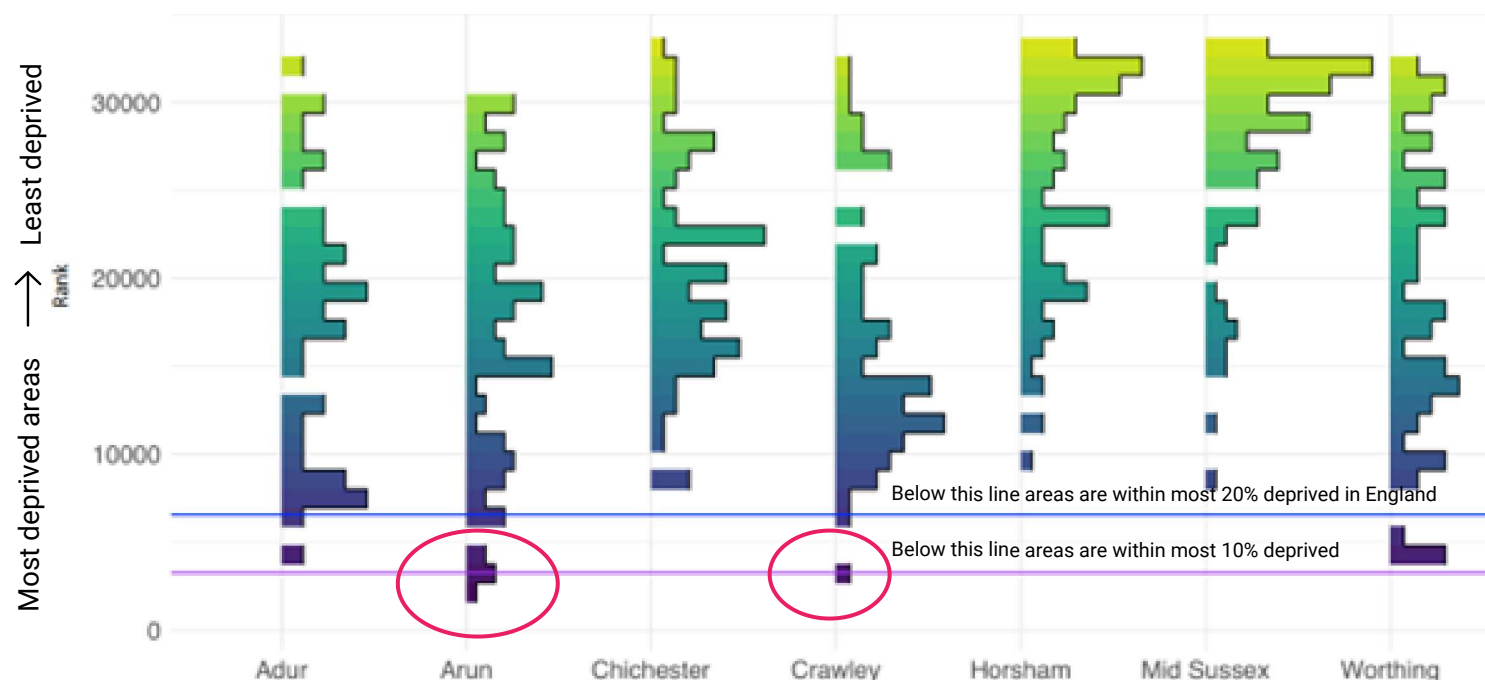

The histogram profiles each lower tier local authority. This helps understand the depth and spread of deprivation in each D&B.

Each small area within a local authority is ranked, the lower the rank the more deprived.

In West Sussex, Worthing has fairly even spread. Horsham and Mid Sussex.

In Arun and in Crawley there are some areas within the most 10% deprived neighbourhoods in England (circled red).

WEST SUSSEX PUBLIC HEALTH OUTCOMES (Data as of September 2024)

ADUR

Note: At Lower Tier Authority Level some outcomes are based on small numbers / sample sizes.

Some issues affect people of all ages, outcomes have been placed in the life stage where the impact may be greatest.

Data are shown for Adur and are compared with ENGLAND. For some measures (e.g. violent crime) difference may relate to recording/reporting so are not RAG rated

Better | **No diff.** | **Worse** | **Not applic.**

Pre-Birth to Early Years

Infant Mortality
2.4 per 1,000 births
Rate of deaths in infants aged under 1 year per 1,000 live births (2020-2022, Eng = 3.9 per 1,000)

14 (2.9%)
babies born in 2022 had a LOW BIRTHWEIGHT (< 2500g) (2022, Eng = 2.9%)

6.0%
mothers SMOKING at the time of delivery (2023/24, Eng = 7.4%)
Note: This is West Sussex level data

13.3%
of children under 16 live in LOW INCOME households (2022/23 Eng = 19.8%)

68.6%
of children assessed as having a GOOD LEVEL OF DEVELOPMENT at the end of reception (2022/23 Eng = 67.2%).

School Years

24.0%
of reception aged pupils (4/5 years) measured as overweight (including obese) (2023/24, Eng = 22.1%)

30.8%
of Year 6 pupils (10/11 years) measured as overweight (including obese) (2023/24 Eng = 35.8%)

KS2
31.9%
pupils known to be eligible for Free School Meals attaining the expected levels at KEY STAGE 2 for Reading, Writing and Maths (2022/23, Eng = 43.6%)

Early Working Life

Suicide Rate
9.8 per 100,000
16 suicides (2021-2023, England rate = 10.7 per 100,000)

Temp
4.2 per 1,00 households
Homelessness: 121 households in temporary accommodation (2022/23, England rate = 4.2)

5.3 per 1,00 households
Homelessness: 152 households owed a duty under the Homelessness Reduction Act (2022/23, England rate = 12.4)

Poor Health (Census 2021)
2.9% (705 people)
of people aged 16-49 years who said their health was bad or very bad on Census 2021(Eng = 2.8%)

4.6% (175)
Young people (aged 18-24 year olds) on out-of-work benefits (GB = 5.2%, South East = 4.0% Data as of July 2024)

46.8
Key Stage 4 - average ATTAINMENT 8 score per pupil (2022/23, England average score = 46.4)

11.2 per 1,000
11 young women under 18 became pregnant in 2021 (England rate = 13.1).

Emergency Admissions Self-harm
138.9 per 100.000
Emergency Hospital Admissions (85 admissions) for Intentional Self-Harm (2022/23 Eng = 126.3)

86.7 per 10,000
Hospital admissions (95 admissions) - unintentional and deliberate injuries in children (aged 0 to 14 years) (2022/23, Eng = 75.3

Mid working life to retirement

24.2 per 1,000
Violence against the person (recorded crime data) rate per 1,000 population - 1,564 offences (2022/23, Eng rate = 34.4)

385 per 100,000
Admission episodes for alcohol related admissions (narrow definition) - 264 admissions (2022/23, England rate = 475)

67.8%
Physically active adults - at least 150 minutes of physical activity per week (2022/23, Eng = 67.1%)

20.3%
Physically inactive adults - less than 30 "equivalent" mins least moderate physical activity per week (2022/23, Eng = 22.6%)

8.9%
Adult smoking prevalence (2022, England rate = 12.7%)
(Note: small sample size)

62.5%
Excess weight in adults (2022/23, England = 64.0%)

71.6%%
BREAST SCREENING % of eligible women screened within the previous 3 years (2023, England = 66.2%)

76.6%
% of people eligible for BOWEL SCREENING who were screened (2023, England = 72.0%)

74.2%
CERVICAL SCREENING - % of Cancer screening coverage - women aged 25 to 49 years old (2023, Eng = 65.8%)

Retirement to older age

Male
80.6 years
MALE life expectancy (2020-2022, Eng = 79.8 yrs)

Female
84.2 years
FEMALE life expectancy (2020-2022, Eng = 82.8 yrs)

Male
7.8 years
Inequality in life expectancy at birth (Slope Index of Inequality) (2018-2020, Eng = 9.7 yrs)

Female
7.3 years
Inequality in life expectancy at birth (Slope Index of Inequality) (2018-2020, Eng = 7.9 yrs)

515 per 100,000
HIP FRACTURES in those aged 65+ , 85 admissions (2022/23, England rate = 558)

10.0%
households experience fuel poverty (low income, low energy efficiency methodology, (2022, England = 13.1%))

Poor Health (Census 2021)
12.0% (1,825 people)
of people aged 65+ years who said their health was bad or very bad on Census 2021(Eng = 12.6%)

92.9 per 100,000
U75 mortality from ALL CANCERS in (2023, Eng rate = 120.8)

54.0 per 100,000
U75 mortality all CARDIOVASCULAR DISEASES (incl heart disease & stroke) (2023, Eng rate = 77.4)

Poor Health (Census 2021)
7.6% (1,000 people)
of people aged 50-64 years who said their health was bad or very bad on Census 2021(Eng = 7.9%)
